

Grape to Glass Wine Modules - *Introductory Level:

These **30 minute** wine sessions offer a brief (but insightful) look at everyday grape varieties that we serve and enjoy from around the world. These focused sessions will look at the different physical characteristics of a grape variety and then different production techniques used to express them.

A brief look at the unique regions and conditions from which they are grown. Then looking at cooler, styles, palate structure, flavour profiles and level of alcohol in these diverse, character filled wines. We will touch on the influence of different traditions, and of course the important process of food and wine pairing with each flight of wines.

These focused sessions will give you more confidence to make better informed decisions on what you can enjoy with varied styles of cuisine, from shell-fish to desserts, summer to winter, light to spicy dishes and more - and improve your knowledge on serving to have better experiences. I promise your taste buds will enjoy the journey.

Each 30 minute session will focus on:

- A single grape variety - the natural characters, levels of acidity and alcohol.
- Take you through 3 wine styles - crafted by traditional / modern production techniques.
- Explain the mechanics of pairing this grape / wine style *(Dry - Sweet) with varied cuisine.
- Things to be aware of when storing open wines - (e.g. On-Premise situations).
- How to correctly serve different these wines - (temperature and stemware).
